Yona Jervis: Practical Experience Sheet

My experience:

I have extensive experience mixing live bands across a range of genres, including Rock, Pop, Soul, and Hip Hop, as well as mixing their recordings. I also have some hands-on experience with system setup and tuning. While I originally got started producing electronic music in a DAW, I've always been more drawn to the technical side of live events and mixing.

Over the past years, I've been involved in more than seven outside broadcasts for Radio ARA. I handled the live mixing during the broadcasts and worked closely with the hosts to ensure smooth and professional shows.

I also recorded and mixed all the artists featured in the Radio ARA Live Studio Gigs, which are used to promote the "Lux Mini Fest" event.
